

RETURN TO WORK WITH CONFIDENCE

WHO WE ARE?

The Higgins Flooring Services team are experts in cleaning, maintenance & restoration of commercial & industrial spaces. We have state-of-the-art chemistry, equipment and processes to keep your spaces clean and healthy. We use EPA registered industrial-strength disinfectants and have stringent safety processes in place. Our team is currently servicing open businesses and hospitals in need of ongoing infection prevention. We are also now scheduling those looking for a facility wide disinfection to help safely transition back to work or school.

WHAT WE DO?

We utilize the EPA registered Clorox Total 360 Electrostatic Sprayer System. This system provides superior coverage on high touch surfaces as well as the hardest-to-reach places, covering what conventional trigger sprays may miss. In addition to our electrostatic system, we are utilizing the latest in physical disinfection procedures. When pathogenic organisms are exposed to the germicidal wavelengths of UV light they are rendered incapable of reproducing and infecting. UV even destroys chlorine-resistant pathogens, making it an ideal addition to other services! This protocol offers the added benefit of leaving no chemical residues or disinfection by-products, making it suitable for sensitive environments.
